

COFFEE SHOP SALES ANALYSIS

Dashboard & Business Insights Report

Prepared from the supplied Excel dashboard and pivot-table screenshots. The report explains what was analyzed and summarizes the visible results. Currency is shown using the '\$' symbol exactly as displayed in the dashboard.

1. Executive Summary

The dashboard analyzes coffee-shop transaction activity across time, products, categories, store locations, order sizes and customer/order KPIs. The supplied dashboard covers January through June and contains 149,116 total footfall with \$698,812.33 in reported sales.

Total Sales	Total Footfall	Avg Bill / Person	Avg Order / Person
\$698,812.33	149,116	4.69	1.44

Analyses included

- Hourly order quantity (6:00–20:00).
- Sales by weekday and monthly sales trend (January–June).
- Top-five products by sales.
- Sales distribution by product category.
- Transaction count and sales by store location.
- Sales distribution by order size.
- Total footfall, average bill per person and average order per person.

2. Time-Based Analysis

Hourly Quantity Orders

The hourly chart tracks quantity orders from 6:00 to 20:00. Quantity rises strongly through the morning, reaches its displayed peak at 10:00, then falls and remains comparatively steady through the afternoon before declining toward 20:00.

Hour	Quantity
6	6,865
7	19,449
8	25,197
9	25,370
10	26,713
11	14,035
12	12,690
13	12,439
14	12,907
15	12,923
16	12,881
17	12,700
18	10,826
19	8,595
20	880

Peak: 10:00 — 26,713 quantity orders. Lowest displayed hour: 20:00 — 880.

Sales by Day of Week

Day	Sales
Sunday	\$98,330.31
Monday	\$101,677.28
Tuesday	\$99,455.94
Wednesday	\$100,313.54
Thursday	\$100,767.78
Friday	\$101,373.00
Saturday	\$96,894.48

Monthly Sales

Month	Sales
January	\$81,677.74
February	\$76,145.19
March	\$98,934.68
April	\$118,941.08

Month	Sales
May	\$156,727.76
June	\$166,485.88

June has the highest monthly sales in the supplied period (\$166,485.88); February has the lowest (\$76,145.19).

3. Product & Category Analysis

Top Five Products by Sales

Product	Sales	Share of Total
Barista Espresso	\$91,406.20	13.1%
Brewed Chai tea	\$77,081.95	11.0%
Hot chocolate	\$72,416.00	10.4%
Gourmet brewed coffee	\$70,034.60	10.0%
Brewed Black Tea	\$47,932.00	6.9%

The highlighted top-five product view is led by Barista Espresso at \$91,406.20. The other displayed products are Brewed Chai tea, Hot chocolate, Gourmet brewed coffee and Brewed Black Tea.

Category Sales Distribution

Category	Sales	Share
Coffee	\$269,952.45	38.6%
Tea	\$196,405.95	28.1%
Bakery	\$82,315.64	11.8%
Drinking Chocolate	\$72,416.00	10.4%
Coffee beans	\$40,085.25	5.7%
Branded	\$13,607.00	1.9%
Loose Tea	\$11,213.60	1.6%
Flavours	\$8,408.80	1.2%
Packaged Chocolate	\$4,407.64	0.6%

Coffee (\$269,952.45) and Tea (\$196,405.95) are the two largest categories in the supplied category pivot. Together they account for about 66.8% of total sales.

4. Store Location & Order Size Analysis

Store Location Performance

Location	Transactions	Sales
Astoria	50,599	\$237,958.15
Hell's Kitchen	50,735	\$236,511.17
Lower Manhattan	47,782	\$238,302.25

The three locations have similar sales totals. Lower Manhattan shows \$238,302.25 in sales; Astoria shows \$237,958.15; Hell's Kitchen shows \$236,511.17. Hell's Kitchen has the highest displayed transaction count (50,735).

Sales by Order Size

Size	Sales	Share
Large	\$237,958.15	34.1%
Not Defined	\$214,690.13	30.7%
Regular	\$199,761.35	28.6%
Small	\$46,402.70	6.6%

Large is the largest defined size category by sales. The 'Not Defined' segment is also substantial (\$214,690.13), so the source data should be checked before using size mix for detailed conclusions.

Customer / Order KPIs

Metric	Value	Description
Total Footfall	149,116	Total customer/person count shown on the dashboard.
Average Bill / Person	4.69	Average sales value per person shown on the dashboard.
Average Order / Person	1.44	Average order quantity per person shown on the dashboard.

5. Key Findings & Use of the Analysis

Findings visible in the dashboard

- Reported sales total: \$698,812.33; reported footfall: 149,116.
- Morning demand is the strongest part of the displayed hourly quantity pattern, peaking at 10:00.
- June is the highest-sales month in the January–June period.
- Coffee and Tea are the largest sales categories in the category analysis.
- The three store locations are close in total sales, with Lower Manhattan slightly highest in the displayed values.
- Barista Espresso is the highest-sales product among the five products highlighted by the dashboard.
- The order-size view includes a material 'Not Defined' category, which is relevant to data-quality interpretation.

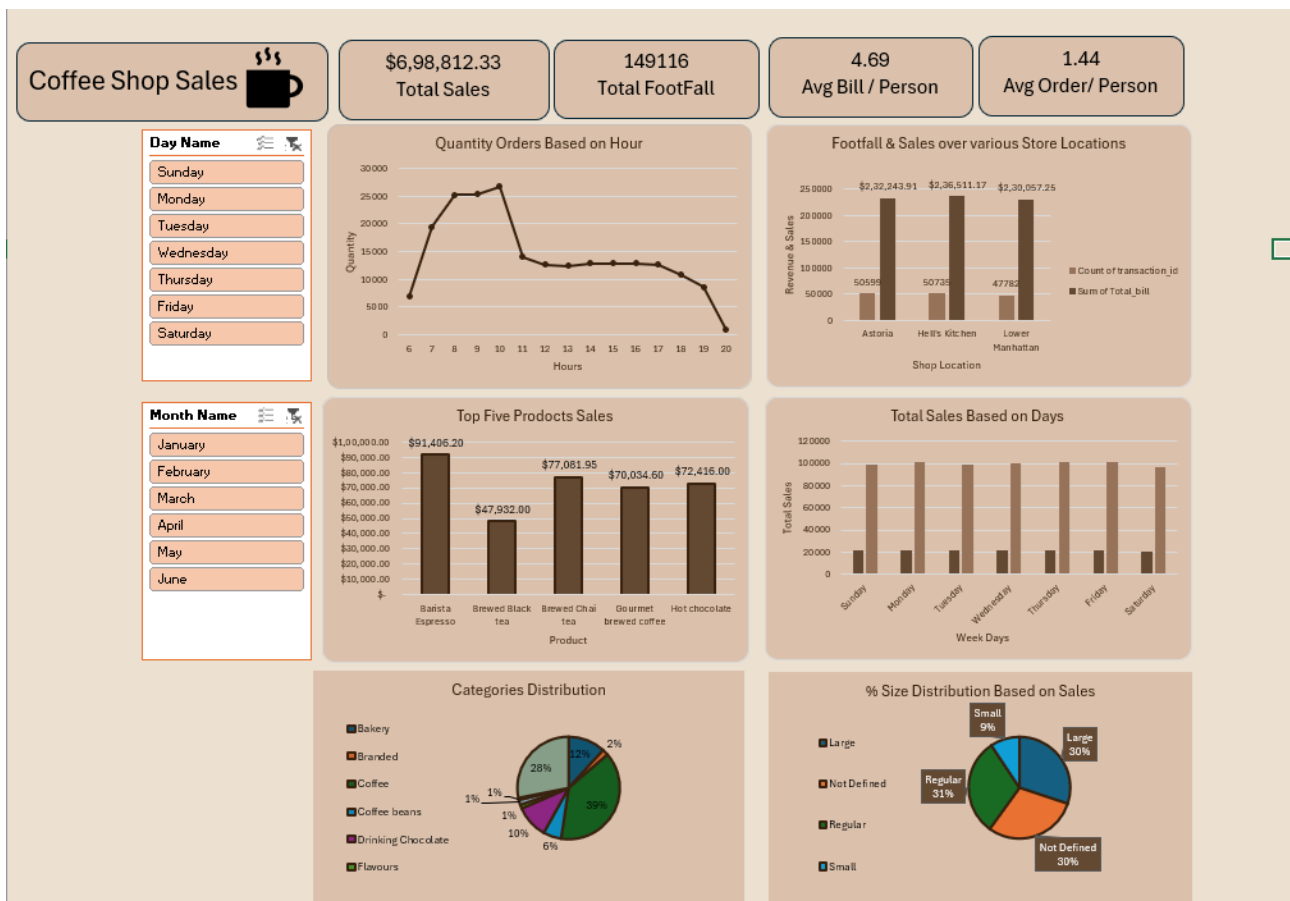

Business questions supported by this project

- Which hours require the most operational capacity?
- Which products and categories contribute most to revenue?
- How evenly are sales and transactions distributed across stores?
- How does sales activity vary by weekday and month?
- What is the observed order-size mix?
- Where are data-quality gaps, such as undefined order size, affecting interpretation?

6. Dashboard / Project Summary

This project demonstrates practical Excel-based data analysis using pivot tables, KPIs, slicers and charts. The dashboard brings together sales, transaction quantity, footfall, product, category, location, size and time dimensions in one view.

Dashboard used for this report

Data interpretation note: values in this report were read from the supplied screenshots. The original transaction dataset was not independently inspected, so the report does not infer fields or currency definitions beyond what is visible.
